

Never Lose Another Asset

WITH SWIPESENSE ASSET TRACKING

Lost, stolen and underutilized hospital equipment is one of the largest uncategorized expense in hospitals. With SwipeSense Asset Tracking, hospitals can reduce theft, stop unnecessary purchases and rentals, and eliminate wasted staff time.

OUR SOLUTION

- Eliminates spend on lost items, rental expenses, and unnecessary equipment purchases.
- Frees employees to care for patients instead of wasting time locating assets.¹
- Ensures annual maintenance is conducted on all equipment, creating a safer environment for patients.

UNIQUE FEATURES

- Modern, intuitive dashboard for every department, including clinical and biomedical staff.
- Room-level accuracy for locating tagged assets.
- SwipeSense provides a fully managed service alleviating any heavy lifting by the hospital.
- Two-year battery life on asset tags eliminates time spent replacing individual batteries.
- Multi-faceted search capabilities (by unit, asset number, and owner).

\$19K SAVED

One of our customers saved \$19K over 6 months purely from locating lost telemetry modules.

37 HRS GAINED

In one month, a BioMed Director at a SwipeSense hospital saved 37 hours he normally spent looking for assets.

\$1M LOST

Lost or stolen equipment costs an average hospital over \$1M every year.

+40%

Equipment is underutilized +40% due to the difficulty in locating materials, leading to unnecessary additional purchases and delays.
